
AAA catabolite
Bile acid
TMAO pathway
Purine
Clinical
Class
E1-only pathway
E4-only pathway
Convergent EC
IMP biosynthesis III
Citrulline metabolism
Arg/Orn/Pro interconversion
Polyamine biosynthesis II
Propanoate fermentation
TCA cycle II
Purine ribonucleoside degradation
Guanosine nt. degradation III
Branched-chain AA biosyn.
UMP biosynthesis
Adenine/adenosine salvage III
Adenosine nt. de novo biosyn.
Peptidoglycan biosynthesis I
SAM cycle I
Urate biosyn. / IMP degradation
5-AIR biosynthesis II
1.16.3.1 ferroxidase
5.1.3.n2 putative sugar epimerase
3.1.3.15 histidinol-phosphatase
2.1.1.13 methionine synthase
2.7.6.3 2-amino-4-hydroxy-6-hydroxymethyld...
4.1.1.37 uroporphyrinogen decarboxylase
5.4.99.62 D-ribose pyranase
2.6.1.1 aspartate transaminase
4.2.1.8 mannonate dehydratase
2.3.1.129 acyl-[acyl-carrier-protein]---UD...
3.2.1.22 alpha-galactosidase
5.1.3.3 aldose 1-epimerase
3.2.1.55 non-reducing end alpha-L-arabinof...
3.2.1.23 beta-galactosidase
layer
p-Cresol
p-Cresol sulfate
Indoxyl sulfate
5-MeOIA
IPA
PAGln
DCA
TCA
TMAO
Betaine
Adenosine
Adenine
Serum UA
Layer
E1-only pathway
E4-only pathway
Convergent EC
